The Whisper of Deceit: Unpacking the Subtle Beginnings of Abuse

The first time I saw the crimson stain on the white carpet, the world tilted. Not a dramatic, earth-shattering tilt, but a slow, insidious lurch that made everything feel...off. It wasn't the blood, though that was undeniably horrifying, but the silence that followed. The strained, careful conversation about "accidents" that painted him as a victim and me as the instigator. I remember the way my own reflection looked back at me in the shattered mirror, the eyes wide, filled with a fear I couldn't quite name. That's when I understood: the seeds of abuse had been sown long before the violence manifested, and I'd been unknowingly nurturing them.

This isn't a story of a dramatic, explosive beginning. It's a story about subtle shifts, about the quiet whispers that become the roar of a storm. It's a story of how I, a seemingly well-adjusted and confident woman, fell into a spiral of abuse that eroded my self-worth and, almost invisibly, consumed my life. The Illusion of the Perfect Start

It's often said that abusive relationships start with a seemingly perfect beginning. A whirlwind romance, intense passion, and promises of a future beyond

compare. Think candlelit dinners, stolen glances, the thrilling rush of falling deeply, madly in love. This was my reality. It felt like a fairytale, all shimmering gowns and whispered secrets. (Image: A photograph of two people smiling warmly, looking into each other's eyes in a romantic setting.) He was charming, witty, and intensely interested in my dreams and aspirations. He knew all my favourite books, all my favourite songs, all my favourite things. It felt like he was reading my mind, almost telepathically. At first, that was exhilarating. It felt deeply validating. But the veneer, as with all things, was temporary. The charm began to mask a darker truth.

## **The Subtle Signs: Recognizing the Red Flags**

The early warning signs often appear so insignificant, so easily dismissed. They are like tiny cracks in a foundation that seem harmless at first.

### **Controlling Behavior**

- Monitoring of activities: This might start with subtle inquiries about where you are going and with whom. A few phone calls, texts, or emails seeming like caring, but quickly morphing into an overwhelming demand for constant accountabilities.
- **Isolation from friends and family:** Gradually, he would start isolating me from my

support system. “They don't understand you,” he’d say, or, “They’re not good for us.” These statements were insidious, slowly eroding my confidence and trust in my own judgement. (Image: A diagram visually representing a network of friends and family, with one person (representing the individual) isolated from the group.)

## Emotional Manipulation

- **Name-calling and put-downs:** The constant criticism, the subtle barbs, the undermining of your self-worth – these are critical components of emotional abuse. He’d trivialize my feelings, dismiss my concerns, and make me question my own sanity.
- **Gaslighting:** This is a particularly insidious form of manipulation. He would twist events, deny things he’d said or done, and make me question my own memory, my perceptions, and even my sanity. It's incredibly damaging, chipping away at your trust in your own judgment. (Image: An illustration depicting a distorted reflection in a mirror, symbolizing gaslighting.)

## Financial Control

- Controlling finances: Early in the relationship, he began subtly controlling access to bank accounts, or insisted on paying all the bills. It seemed like a kind gesture at first, but it rapidly became a tool of control.
- *Instilling fear of financial instability:* He'd create scenarios where my

financial well-being was contingent on his approval and decisions.

## Other Subtle Indicators

- **Possessiveness:** Jealousy and possessiveness are warning signs. It may start subtly and progress to an unreasonable and intimidating level of control.
- **Sudden shifts in mood:** He'd go from being incredibly affectionate to unexpectedly angry. This inconsistency is a major red flag, reflecting deeper instability.

## **How Does an Abusive Relationship Start? Unraveling the Subtle Beginnings**

It's a question many ask after experiencing or witnessing abuse: "How does something so devastating begin so

subtly?" The truth is, abusive relationships rarely start with overt aggression. Instead, they often begin with a quiet, insidious creep, weaving themselves into the fabric of a relationship before their toxic nature becomes apparent. Understanding these early warning signs is crucial, not to blame victims, but to empower individuals to recognize and disengage from potentially harmful dynamics. The journey into an abusive relationship is a gradual process, a series of small steps that, when viewed individually, might seem insignificant. However, when combined, they form a pattern of control and manipulation that can leave individuals feeling isolated, devalued, and trapped. This article will delve into the subtle yet powerful ways abusive relationships begin, exploring the tactics used by abusers and the underlying factors that can make someone vulnerable.

## **The Honeymoon Phase: Love Bombing and Idealization**

The initial stages of an abusive relationship are often characterized by intense affection and attention. This phase, sometimes referred to as "love bombing," can feel incredibly intoxicating. The abuser will shower their new partner with compliments, gifts, and unwavering attention. They might express feeling like they've "never felt this way before" and declare that they've "found their soulmate."

This overwhelming display of affection serves a crucial purpose for the abuser: to quickly build a strong emotional bond and create a sense of dependency. They aim to make you feel incredibly special, unique, and deeply loved. This intense validation can be incredibly appealing, especially if you've experienced past insecurities or loneliness.

During this phase, the abuser will often mirror your interests, desires, and values. They seem to be your perfect match, understanding you in ways no one else ever has. This creates a powerful illusion of connection and shared destiny. It's this initial intense positive reinforcement that makes it so difficult to later recognize the negative behaviors that emerge.

**Keywords:** love bombing, idealization, intense affection, soulmate, validation, emotional bond, dependency, mirroring interests.

## **Early Warning Signs: The Cracks Begin to Show**

While the honeymoon phase is captivating, subtle red flags often begin to appear, usually disguised as concern or protectiveness. These early warning signs are frequently dismissed by the target of abuse because they are subtle and often accompanied by loving gestures.

## **Jealousy and Possessiveness Disguised as Care**

One of the first signs is often heightened jealousy and possessiveness. The abuser might express discomfort with you spending time with friends or family, or they might question your interactions with colleagues of the opposite sex. They frame this as a sign of their deep love and desire to protect you.

"I just worry about you," or "I miss you so much when you're not around," can be innocent statements. However, when these feelings escalate into demands, accusations, or attempts to isolate you, they become warning signs. This possessiveness is not about love; it's about control and ownership.

You might find yourself being asked to account for your whereabouts, with every phone call or text message scrutinized. This can feel like an invasion of privacy, but the abuser will often apologize and attribute it to their "insecurity" or "fear of losing you," making you feel guilty for questioning them.

## **Subtle Criticisms and Demeaning Comments**

Another common tactic is the introduction of subtle criticisms or demeaning comments. These are often delivered with a smile or a playful tone, making it hard to address directly. They might target your appearance, intelligence, or decisions.

"Oh, are you really going to wear that? It's not my favorite," or "You're so funny when you try to be smart." These comments chip away at your self-esteem, making you question your judgment and worth. The abuser's goal is to subtly undermine your confidence, making you more reliant on their approval.

Initially, you might brush these off as jokes or constructive feedback. However, over time, the frequency and harshness of these comments increase, and they start to erode your self-perception. This can lead to a gradual decrease in your confidence and a greater willingness to accept their negative opinions.

### **Control Over Your Time and Social Life**

As the relationship progresses, the abuser will often start to exert control over your time and social life. They might express disappointment if you make plans without them, or they might subtly sabotage your social engagements.

This could manifest as sudden demands for your attention when you're with friends, making you feel obligated to leave. Or, they might create drama or arguments just before you are due to go out, effectively preventing you from attending. The goal is to gradually limit your support network and increase your dependence on them.

This isolation is a critical step in the abusive cycle. By cutting you off from friends and family, the abuser removes external voices that might warn you of the

danger or offer support. You become more vulnerable and easier to manipulate when your only source of validation and social interaction is the abuser.

**Keywords:** jealousy, possessiveness, control, subtle criticism, demeaning comments, self-esteem, undermining confidence, isolation, social life control, sabotage.

## **Escalation and Manipulation: The Pattern Emerges**

Once a degree of control has been established, the abuser will begin to escalate their tactics. The subtle criticisms can become more overt, and the possessiveness can morph into outright demands and threats. Manipulation becomes a key tool in their arsenal.

### **Gaslighting: Making You Doubt Your Reality**

Gaslighting is a particularly insidious form of manipulation where the abuser makes you question your own memory, perception, and sanity. They will deny things they said or did, twist events, and accuse you of being forgetful, confused, or overly sensitive.

"I never said that," or "You're imagining things," are common phrases in a gaslighting scenario. The abuser's goal is to make you doubt your own judgment, so you become more reliant on their version of reality. This can be incredibly disorienting and lead to a profound loss of

self-trust.

For example, if you recall a specific incident where they were verbally abusive, they might deny it ever happened, or claim you misunderstood their intentions. They might even twist the narrative to suggest that \*you\* were the one who was being aggressive or unreasonable, making you feel guilty and apologetic for something you didn't do. This constant questioning of your reality can be deeply damaging to your mental health.

## **Emotional Blackmail and Guilt Trips**

Emotional blackmail and guilt trips are also common tactics used to keep you in line. The abuser might threaten to harm themselves if you leave, or they might make you feel responsible for their happiness or unhappiness.

"If you really loved me, you would do this," or "I don't know what I would do without you." These statements are designed to make you feel indebted and obligated. They exploit your desire to be a good partner and your empathy.

You might find yourself constantly apologizing, even when you know you've done nothing wrong, simply to de-escalate a conflict or appease their emotional state. This creates a cycle of constantly walking on eggshells, trying to avoid upsetting them.

## **Creating Dependency: Financial and Emotional**

Abusers often work to create dependency in their partners, both financially and emotionally. They might discourage you from working or earning your own money, or they might control the household finances, making it difficult for you to leave.

Emotionally, they foster a situation where you feel you can't function without them. This can be achieved through the constant erosion of your self-confidence, making you believe you're incapable of making good decisions or surviving on your own.

The feeling of being trapped is a powerful motivator for staying in an abusive relationship. When you feel you have no financial resources or emotional resilience, the prospect of leaving can seem insurmountable. This dependency is a deliberate tactic to maintain control.

**Keywords:** gaslighting, emotional blackmail, guilt trips, dependency, financial control, emotional control, manipulation, doubt reality, walk on eggshells.

## **The Role of Vulnerability and Past Experiences**

While the abuser is always responsible for their actions, certain factors can make individuals more susceptible to falling into an abusive relationship. Understanding these

vulnerabilities can help in building resilience and recognizing unhealthy patterns.

### **Past Trauma and Insecurity**

Individuals who have experienced past trauma, such as childhood abuse or neglect, may have a higher propensity for seeking external validation. They might be drawn to the intense affection of love bombing, mistaking it for the unconditional love they may have lacked.

Past experiences of feeling devalued or unheard can also make someone more likely to accept subtle criticisms or dismiss concerning behaviors. They may have become accustomed to certain negative dynamics and not recognize them as abusive.

### **Low Self-Esteem and People-Pleasing Tendencies**

Low self-esteem can make it difficult to assert boundaries or recognize when your needs are not being met. People who are natural people-pleasers might prioritize the happiness of others above their own, making them more susceptible to guilt trips and emotional blackmail.

They may find it hard to say "no" or to express their own needs, fearing conflict or rejection. This can inadvertently create an environment where an abuser can easily exploit their desire to be liked and accepted.

## **Unrealistic Expectations of Relationships**

Sometimes, unrealistic expectations fueled by media, popular culture, or romanticized notions of love can contribute to overlooking early warning signs. The idea of a "passionate" or "intense" relationship can sometimes mask controlling or unhealthy behaviors.

When you believe that intense emotions and constant drama are hallmarks of true love, you might be less likely to question the early signs of an abusive dynamic. This can lead to normalizing unhealthy relationship behaviors.

**Keywords:** past trauma, insecurity, low self-esteem, people-pleasing, unrealistic expectations, relationship dynamics, vulnerability, resilience.

## **Breaking the Cycle: Recognizing and Reclaiming**

The realization that you are in an abusive relationship can be a painful and confusing process. However, recognizing the subtle beginnings is the first crucial step towards reclaiming your well-being and safety.

It's important to remember that abusive relationships do not start with overt violence. They begin with a gradual erosion of your boundaries, self-worth, and autonomy. By understanding these subtle origins, individuals can be better equipped to identify warning signs and seek help if

needed.

If you recognize any of these patterns in your own relationship, please know that you are not alone, and help is available. Reaching out to trusted friends, family members, or professional organizations specializing in domestic abuse can provide the support and guidance you need to break free from an abusive dynamic.

The journey to healing and recovery is possible. It begins with acknowledging the truth of the situation and taking brave steps towards a life free from abuse.

How Does an Abusive Relationship Begin? Understanding the Hidden Origins Abusive relationships do not emerge overnight like a sudden storm. Instead, they often develop gradually, rooted in subtle patterns and emotional dynamics that may go unnoticed until harm becomes undeniable. Understanding how these relationships start requires looking beyond visible aggression to uncover the underlying processes that erode trust, autonomy, and respect. At the core of many abusive relationships is the gradual erosion of boundaries. It often begins with seemingly harmless behaviors—gentle manipulation, persistent criticism disguised as care, or an increasing need for control framed as “concern.” These early signs

may appear small and even romantic at first, making it difficult for individuals to recognize the shift in power dynamics. Over time, the abuser's need to dominate grows, cloaked in affection or concern, convincing the victim that resistance is futile or unwise. This slow tightening of control creates a psychological trap where the victim begins to internalize the abuser's narrative, believing compliance ensures safety or love. Another key insight lies in the role of emotional dependency. Abusers frequently exploit feelings of insecurity, low self-worth, or fear of abandonment to deepen reliance on them. By offering intermittent praise and affection—what psychologists call “love bombing”—they build intense emotional bonds that make it harder for victims to leave. This cycle of rejection and reconciliation confuses emotions, reinforcing the belief that the relationship is uniquely valuable despite its toxicity. The victim may come to associate the abuser's anger or withdrawal with abandonment, not just control, further entrenching the cycle. Power and control are not always overt; they manifest through micro-behaviors that accumulate over time. Small acts—monitoring phone use, dictating social interactions, or dismissing the victim's opinions—erode independence step by step. What begins as a subtle imbalance often escalates because the abuser rarely acknowledges or justifies these actions. Instead, they rationalize them as necessary for protection or stability, blurring the line between care and control. This

normalization makes it difficult for victims to recognize the abuse until it has deeply embedded itself in daily life. From a broader perspective, societal and cultural influences also shape how abusive relationships begin. Media portrayals that glorify possessiveness or romanticize “intense” love can distort expectations, making harmful behaviors seem normal or even desirable. Additionally, systemic issues like gender norms that reinforce unequal power structures contribute to environments where abuse can take root. Awareness of these influences helps individuals distinguish between healthy connection and manipulation. Recognizing the early stages is crucial—not only for prevention but for empowering individuals to reclaim agency. By understanding the psychological and behavioral patterns that signal the start of abuse, people can take proactive steps to protect themselves and seek support before harm intensifies. Education, open dialogue, and accessible resources play vital roles in breaking the cycle before it deepens. Looking ahead, the future of addressing abusive relationships hinges on expanding awareness and creating safer spaces for disclosure. Advances in digital outreach, community education, and mental health support offer promising tools to intervene early. As society continues to challenge stigma and normalize conversations about emotional abuse, more individuals will feel empowered to recognize red flags and seek help. Ultimately, dismantling the roots of abuse begins with understanding its subtle

beginnings—transforming silence into strength and vulnerability into resilience.

## **The Insidious Seed: How Does an Abusive Relationship Start?**

Abuse rarely announces itself with a siren. More often, it begins with a whisper, a subtle shift in dynamics that, in hindsight, reveals itself as the insidious planting of a seed. Understanding how abusive relationships begin is crucial for prevention, recognition, and ultimately, for breaking free. It's a complex dance of manipulation, charm, and eroding boundaries, often masked by a veneer of love and affection. This article delves into the nuanced beginnings of abusive relationships, exploring the tactics employed by perpetrators and the vulnerability factors that can contribute to a victim's entrapment.

## **The Allure of the Ideal: Love Bombing and Initial Charm**

One of the most common and deceptive ways abusive relationships start is through a phenomenon known as "love bombing." At the outset, the abuser often presents themselves as the perfect partner, showering the target with an overwhelming amount of attention, affection, compliments, and gifts. This intense period can feel

intoxicating and validating, especially for individuals who may have experienced past trauma, insecurity, or a lack of appreciation. Keywords like **"manipulative tactics," "narcissistic abuse,"** and **"early signs of abuse"** are central to understanding this phase.

During love bombing, the abuser mirrors the victim's desires and aspirations, making them feel deeply understood and cherished. They might profess undying love very quickly, talk about marriage and a future together within weeks or even days, and isolate the victim from their existing social support systems under the guise of wanting all their time and attention. This can feel like finding a soulmate, a rare and precious connection that seems too good to be true. However, this intensity is not born of genuine affection but of a calculated strategy to quickly gain control and dependency.

## **Erosion of Boundaries: The Gradual Tightening of the Grip**

Following the initial phase of intense affection, the abuser begins the slow, deliberate process of eroding the victim's boundaries. This is where the subtlety of abusive beginnings truly shines. It's not a sudden explosion of rage but a gradual chipping away at the victim's autonomy, self-esteem, and personal space. This can manifest in several ways:

## **Controlling Behavior Disguised as Care**

What may initially be perceived as concerned inquiries about the victim's whereabouts or well-being can morph into intrusive questioning and demands for constant updates. Phrases like "I just worry about you" or "I want to know you're safe" are common justifications. This can escalate to monitoring phone calls, texts, and social media, or dictating who the victim can and cannot see. The abuser might express "disappointment" or "hurt" when their demands aren't met, employing guilt-tripping to ensure compliance. Understanding "**coercive control**" and "**controlling relationships**" is vital here.

## **Subtle Criticism and Belittling**

Instead of overt insults, the abuser might start with backhanded compliments or subtle digs at the victim's intelligence, appearance, or choices. "That dress looks nice, but it's a bit... revealing, isn't it?" or "Are you sure you want to pursue that career? It might be too challenging for you." These comments, delivered with a seemingly innocent tone, are designed to sow seeds of doubt and insecurity. Over time, these criticisms become more frequent and pointed, gradually undermining the victim's self-worth. This can be a precursor to "**emotional abuse**".

## **Isolation Tactics: Cutting the Ties That Bind**

A crucial element in the start of an abusive relationship is the abuser's systematic effort to isolate the victim from their support network. This can begin with subtly discouraging contact with friends and family, suggesting they are "jealous" or "don't understand" the relationship. The abuser might create drama or conflict with the victim's loved ones, making it easier for the victim to withdraw. They may also monopolize the victim's time, making it difficult to maintain existing relationships. Isolation makes the victim more dependent on the abuser and less likely to seek help or realize the extent of the abuse. This aligns with keywords like **"domestic violence warning signs"** and **"toxic relationships"**.

## **Gaslighting: Rewriting Reality**

Gaslighting is a insidious form of psychological manipulation where the abuser makes the victim question their own sanity, memory, and perception of reality. This often starts with denying things that happened, or making the victim believe they misunderstood something. For example, if the victim confronts the abuser about a hurtful comment, the abuser might say, "I never said that," or "You're being too sensitive, you're imagining things." This constant questioning of their reality can leave the victim feeling confused, disoriented, and increasingly reliant on the abuser's version of events. This is a key element of

**"psychological abuse".**

## **The Victim's Role: Vulnerability and Unmet Needs**

It's important to state unequivocally that the victim is never to blame for the abuse they endure. However, certain vulnerabilities and unmet needs can make individuals more susceptible to falling into abusive dynamics, particularly in the early stages. Understanding these factors is not about assigning fault but about recognizing patterns and improving preventative strategies.

### **Past Trauma and Insecurity**

Individuals who have experienced childhood trauma, neglect, or previous abusive relationships may have lower self-esteem and a greater longing for validation and connection. They might be more likely to overlook red flags, mistaking controlling behavior for intense love or insecurity for genuine concern. Keywords such as **"trauma bonding"** and **"childhood abuse effects"** are relevant here.

### **Desire for Intimacy and Connection**

The human need for love and belonging is powerful. Abusers often prey on this desire, offering an intense and seemingly perfect connection that fulfills these

fundamental needs. This can be particularly appealing to those who feel lonely or isolated, making them more willing to overlook subtle warning signs in their pursuit of a deep bond. The initial whirlwind romance can feel like the answer to their prayers, making it harder to question.

## **Unrealistic Expectations of Relationships**

Societal narratives, media portrayals, and even upbringing can sometimes foster unrealistic expectations about romantic relationships. If someone believes that intense passion, possessiveness, or constant attention are hallmarks of true love, they might not recognize these traits as potential indicators of abuse. The idea of a "fiery" or "passionate" relationship can be misinterpreted, masking controlling and harmful behaviors.

## **The Slippery Slope: When Normal Becomes Abusive**

The transition from a healthy, albeit intense, beginning to an abusive dynamic is often so gradual that it's barely perceptible. The abuser is a master of adaptation, adjusting their tactics to fit the victim's responses. What might have been a minor disagreement or a moment of overzealousness at the start can, with repeated occurrences and the erosion of boundaries, become normalized abusive behavior.

## **Normalization of Minor Infringements**

It starts small. A partner asking to borrow your phone and then "accidentally" looking through it. A comment about your outfit that feels slightly off. A friend you used to see regularly who you now see less of because your partner "dislikes" them. Each instance, on its own, might seem minor or easily justifiable. However, these are the small cracks that appear, widening over time and allowing the abuser's control to seep in. Recognizing **"relationship red flags"** is critical at this stage.

## **The Cycle of Abuse: Setting the Stage for Recurrence**

While the initial stages focus on the beginning, it's important to acknowledge how these early tactics set the stage for the classic cycle of abuse: tension building, incident, reconciliation, and calm. The initial love bombing and charm phase acts as the "reconciliation" or "calm" phase, rebuilding trust and hope after minor transgressions. This cycle is designed to keep the victim trapped, oscillating between periods of distress and moments of perceived affection, making it incredibly difficult to leave.

## **Breaking the Illusion: Recognizing the**

## Pattern

|----|----------------------------------------------------------------|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| 1  | Is it always obvious when an abusive relationship is starting? | Not at all. Abusive relationships often begin subtly, with seemingly small controlling behaviors or manipulations that are easily excused or overlooked. The escalation is gradual, making it difficult to identify the start. |

|   |                                                                                                   |                                                                                                                                                                                                                         |
|---|---------------------------------------------------------------------------------------------------|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| 2 | What are some early warning signs that a relationship might turn abusive?                         | Early signs include excessive jealousy, constant criticism, attempts to isolate you from friends and family, quick declarations of love ('love bombing'), and making you feel guilty or responsible for their emotions. |
| 3 | Can someone be 'too nice' or a 'people-pleaser' and be more susceptible to abusive relationships? | Yes, individuals who are naturally empathetic, have a strong desire to please, or have past experiences of people-pleasing can be more vulnerable. Abusers often exploit these qualities by demanding more and more.    |
| 4 | Does love bombing indicate the beginning of an abusive relationship?                              | Love bombing, which is excessive flattery and affection early on, can be a red flag. It's often used to create a sense of obligation and dependency, making it harder to leave later when controlling behaviors emerge. |
| 5 | How do abusers gain control in the early stages of a relationship?                                | Abusers gain control through manipulation, gaslighting (making you doubt your own reality), isolating you, and subtly undermining your confidence. They aim to make you dependent on their approval and perception.     |

|   |                                                                                 |                                                                                                                                                                                                                                   |
|---|---------------------------------------------------------------------------------|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| 6 | Is it possible for an abusive relationship to start with positive interactions? | Absolutely. Abusers often present a charming and ideal persona initially, showering you with affection and attention. This 'honeymoon phase' is designed to build trust and make you overlook any emerging problematic behaviors. |
| 7 | What role does technology play in the start of abusive relationships?           | Technology can be an early tool for control. This might include constant texting, monitoring your social media, demanding access to your devices, or tracking your location, all disguised as care or concern.                    |
| 8 | Can pressure to change your appearance or interests be an early sign of abuse?  | Yes. Subtle suggestions or outright demands to change how you dress, your hobbies, or who you socialize with are forms of control. They aim to mold you into someone the abuser prefers.                                          |
| 9 | When does a relationship move from normal conflict to the start of abuse?       | Normal conflict involves disagreements and finding solutions. The start of abuse involves consistent disrespect, contempt, attempts to dominate or control your decisions, and making you feel constantly anxious or on edge.     |

|    |                                                                                   |                                                                                                                                                                                                                        |
|----|-----------------------------------------------------------------------------------|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| 10 | If someone I know is in a new relationship with many red flags, what should I do? | Approach with care and offer support without judgment. Gently point out concerning behaviors, encourage them to trust their instincts, and provide resources for abuse awareness. Let them know you're there for them. |
