1	What are the main reasons why early American colonists decided to leave their homes in Europe and come to North America?	Colonists left Europe for a variety of reasons, including seeking religious freedom, finding economic opportunities like new land and jobs, escaping political unrest or persecution, and for some, the spirit of adventure and exploration.
2	How did the geography of different regions in the thirteen colonies (like New England, the Middle Colonies, and the Southern Colonies) affect the way people lived and made a living?	Geography played a huge role! New England's rocky soil and cold climate led to small farms and a focus on fishing and shipbuilding. The Middle Colonies had fertile land, ideal for growing grains. The Southern Colonies had a warm climate and rich soil, perfect for large plantations growing cash crops like tobacco and indigo.
3	What was the Stamp Act and why did it make the colonists so angry?	The Stamp Act was a tax imposed by the British government on all paper documents in the colonies, like newspapers, legal documents, and playing cards. 7	How did the invention of the cotton gin by Eli Whitney change the Southern economy and society?	The cotton gin made it much easier and faster to separate cotton fibers from seeds. This led to a massive increase in cotton production, which in turn increased the demand for enslaved labor to work the plantations, deeply impacting the social and economic structure of the South.
8	What were some of the major challenges and achievements faced by the United States during its westward expansion in the 19th century?	Challenges included the harsh conditions of travel, conflicts with Native American tribes, and the difficult task of settling new territories.
