Language and Region Selection

The first thing you'll be prompted to do is select your preferred language and region. This ensures your iPhone displays information and currency correctly for your location. Simply tap on your choice from the list.

Quick Start: The Magic of Transferring Data

This is where Apple's magic truly shines. If you're upgrading from an older iPhone or even an Android device, the Quick Start feature makes transferring your data (apps, photos, contacts, messages, and more) incredibly simple. You'll be guided to bring your old device near your new one. Follow the on-screen prompts, which might involve scanning an animation with your new iPhone's camera.
