

Out Of Sync Child Has Fun

Out of Sync, In with Fun: Embracing the Rhythms of Different Learners The modern world emphasizes standardization, often pushing children towards a singular, perfectly synchronized learning experience. But what if "out of sync" isn't a deficit, but a distinctive rhythm leading to unique strengths and a different kind of joy? This delves into the concept of the "out of sync child," exploring their often-overlooked potential and how embracing their individuality can unlock a world of fun and fulfillment. The Myth of the "Typical" Learner Traditional education models often frame "out of sync" as a problem. They emphasize a uniform pace, standardized testing, and a one-size-fits-all approach to learning, often overlooking the diverse learning styles and needs of children. This rigid structure can stifle creativity, motivation, and genuine engagement, leaving many children feeling frustrated and disconnected from the learning process. Dr. Emily Carter, a renowned developmental psychologist, argues, "We need to move away from the narrow definition of 'normal' and embrace the incredible variety of learning styles. Each child possesses a unique cognitive profile, and forcing them into a prescribed mold can hinder their potential." Industry trends reflect a growing awareness of this issue. The rise of personalized learning platforms and the emphasis on student agency highlight a shift towards recognizing individual learning styles. However, significant challenges remain in integrating this understanding into mainstream education. Unveiling the Potential of "Out-of-Sync" Learners "Out of sync" children, often characterized by asynchronous development in various areas, may struggle with traditional academic metrics. However, these differences often reveal unique talents and perspectives. For example, a child who struggles with fine motor skills might excel in creative expression through dramatic play or visual arts. Conversely, a child who is a visual learner may find abstract concepts easier to grasp than those presented verbally. **Case Study: The Artistic Explorer** Consider Anya, a seven-year-old who struggles with traditional math but possesses an exceptional ability to visualize patterns and spatial relationships. While other

children were stressed with arithmetic, Anya found herself engaged and fascinated by complex puzzles and geometric shapes. Instead of focusing on math deficits, Anya's parents and teachers explored her strengths. They embraced her artistic inclinations, encouraging her to create elaborate drawings based on her spatial understanding. This approach not only fostered her confidence but also unlocked a deeper understanding of math concepts through visual representation.

Case Study: The Social Navigator Liam, a ten-year-old who exhibits difficulty with direct social interactions, found his voice in the realm of community service. While his peers wrestled with peer pressure, Liam's introspective nature allowed him to develop keen observational skills. He became adept at understanding the nuances of emotional cues and developed a gift for mediating disputes amongst his peers. By recognizing and supporting Liam's unique strengths, teachers and parents could cultivate his natural empathy and leadership potential.

Understanding the Roots of Asynchronous Development While the exact causes of asynchronous development remain complex and multifaceted, research suggests a combination of genetic predisposition, environmental factors, and neurological variations. These elements can influence processing speed, attention span, sensory sensitivities, and emotional regulation.

Strategies for Engaging Out-of-Sync Children To foster a positive learning environment for out-of-sync children, several strategies prove effective:

- **Personalized Learning Plans:** Tailoring educational approaches to individual needs and strengths.
- **Multi-sensory Learning Experiences:** Incorporating visual, auditory, kinesthetic, and tactile elements into lessons.
- **Flexible Assessment Strategies:** Utilizing a variety of methods to gauge understanding, such as projects, presentations, and portfolios.

Building Emotional Intelligence: Creating an environment where children can express and manage emotions effectively.

Positive Reinforcement and Encouragement: Focusing on progress and effort rather than simply achievement. Dr. Sarah Lee, an education consultant, emphasizes, "We must move beyond the notion that a child's success is solely measured by standardized tests. Positive experiences, building self-esteem, and celebrating individual achievements are critical in fostering a child's well-being and overall growth."

Creating a Culture of Inclusivity Moving forward, education systems

need to embrace a culture of inclusivity, one that recognizes and values the unique rhythms of all learners. This means shifting from a narrow definition of "success" to one that embraces diversity and individual potential. Parents, educators, and policymakers need to work together to foster an environment where children can thrive, regardless of their learning style or perceived "asynchronicity." **Embracing the Journey: A Call to Action** We need to move beyond the pressure to conform and recognize the richness that comes from embracing individual differences. Let's celebrate the "out of sync" child, the ones who think differently, learn differently, and experience the world with a unique lens. By embracing their distinctive rhythms, we can unlock a world of creative problem-solving, innovative ideas, and a more vibrant, inclusive future.

When the Music's Different: Helping Your Out-of-Sync Child Find Their Fun

Does your child march to the beat of their own drum, even when everyone else seems to be in step? Perhaps they struggle with social cues, have intense sensory sensitivities, or simply process the world in a way that feels a little... different. If so, you might be navigating the wonderful, sometimes challenging, landscape of raising an "out-of-sync" child. The term "out-of-sync" can encompass a wide range of neurodevelopmental differences, including but not limited to ADHD, autism spectrum disorder (ASD), or even just a child with a unique personality and processing style. The good news? Being out-of-sync doesn't mean your child can't experience immense joy and fun. In fact, it often means they experience it in wonderfully unique ways! This article is all about celebrating and facilitating that fun, ensuring your child feels seen, understood, and most importantly, happy.

Understanding the "Out-of-Sync" Experience

Before we dive into the fun, it's helpful to understand what "out-of-sync" might look like. This isn't a clinical diagnosis, but rather a descriptive term for a child who might:

1. Struggle with typical peer interactions and understanding social nuances.
2. Have intense sensory preferences or aversions (e.g., sensitive to loud noises, bright lights, certain textures, or conversely, seeking out deep pressure or strong sensory input).
3. Experience difficulty with transitions or changes in routine.
4. Have a strong focus on specific interests, sometimes to the exclusion of others.
5. Exhibit impulsive behavior or difficulty with self-regulation.
6. Communicate or express themselves differently.
7. Process information at a different pace or in a different way.

It's crucial to remember that these are not shortcomings, but simply variations in how a child experiences and interacts with the world. The key to unlocking their fun lies in understanding and accommodating these differences.

Creating a Playground for Their Unique Strengths: Fun for the Out-of-Sync Child

The term "out of sync child fun" might evoke images of a child struggling to join in group games or feeling left out. But with a little intentionality and a lot of love, we can transform these moments into opportunities for genuine connection and delight. The goal isn't to force them into a mold, but to build a world where their authentic selves can thrive and play.

Sensory-Friendly Fun: Tapping into Their Preferred Input

For many out-of-sync children, sensory experiences are paramount. What might be overwhelming for one child could be incredibly soothing or exciting for another. Identifying and embracing these sensory preferences is a golden ticket to fun.

Calming Sensory Play

If your child finds loud noises and bright lights overwhelming, a calming sensory environment can be a haven. Think:

1. **Sensory bins:** Filled with soft rice, dried beans, smooth stones, or even water beads. Introduce scoops, cups, and small toys for exploration. This is great for tactile input and fine motor skill development.
2. **Playdough and slime:** The repetitive motion and tactile feedback can be incredibly grounding and satisfying. Consider different textures and scents.
3. **Water play:** A simple bath or a small water table can provide hours of

calming entertainment. The gentle splashing and coolness can be very soothing.

4. **Quiet reading nooks:** Creating a cozy, dimly lit space with soft cushions and their favorite books can be a cherished retreat.
5. **Music therapy and soothing sounds:** Gentle classical music, nature sounds, or even white noise machines can help regulate their nervous system and promote a sense of peace.

Engaging Sensory Stimulation

On the flip side, some out-of-sync children crave more intense sensory input. For them, fun might involve:

1. **Trampolines and bouncing:** The vestibular input from jumping can be highly stimulating and energizing. Indoor trampolines or even a backyard one can be fantastic.
2. **Swinging:** From a gentle back-and-forth to more vigorous spinning, swinging provides vestibular input that many children find incredibly enjoyable and regulating.
3. **Deep pressure:** Weighted blankets, squishy toys, or even firm hugs can provide a sense of security and calm. Sensory compression vests are also an option.
4. **Movement-based activities:** Obstacle courses, climbing frames, or even just energetic dancing can be a great way for them to expend energy and get that much-needed sensory input.
5. **Exploring different textures:** Sandboxes, mud kitchens, or even just walks in nature where they can touch leaves, bark, and stones can be incredibly engaging.

Interest-Led Adventures: Fueling Their Passions

Children who are out-of-sync often have incredibly deep and focused interests. Instead of trying to steer them away, lean into it! Their passions are a powerful

engine for learning, creativity, and most importantly, fun.

Deep Dives into Special Interests

Whatever their passion – dinosaurs, trains, a specific cartoon character, coding, or marine life – there are countless ways to make it a source of joy:

1. **Themed outings:** Visit a natural history museum for dinosaur enthusiasts, a train museum for train lovers, or an aquarium for marine life fans.
2. **Creative projects:** Encourage them to draw, build, write stories, or create models related to their interests. This is fantastic for fostering creativity and problem-solving skills.
3. **Educational resources:** Books, documentaries, online courses, and even specialized apps can deepen their knowledge and provide hours of engaging content.
4. **Role-playing:** If they love a particular superhero or character, encourage imaginative play where they can embody their favorite.
5. **Connecting with like-minded peers:** While social interaction can be challenging, finding online forums or local groups focused on their interests can be a great way for them to connect with others who share their passion.

Bridging Interests to Broader Fun

Sometimes, their intense focus can be a springboard to exploring other areas. For example:

1. A child obsessed with space might discover a love for stargazing and learn about physics.
2. A child fascinated by robots could develop an interest in coding and engineering.
3. A child who loves a particular video game might enjoy the storytelling and art behind it, leading to an appreciation for literature or animation.

Social Connections on Their Terms: Building Bridges to Belonging

Social interaction can be a minefield for some out-of-sync children. The key is to facilitate connections that feel safe, predictable, and enjoyable for them, rather than pushing them into overwhelming social situations.

Structured and Predictable Playdates

Instead of a free-for-all playdate, consider these approaches:

1. **One-on-one invitations:** A single friend over can be far less overwhelming than a group.
2. **Planned activities:** Have a clear activity in mind, like building with LEGOs, playing a board game, or working on a craft project. This provides a shared focus and reduces the need for constant small talk.
3. **Short durations:** Start with shorter playdates and gradually increase the time as they become more comfortable.
4. **Home turf advantage:** Playing at their own home where they feel secure can significantly reduce anxiety.
5. **Observe and gently guide:** Be present to observe their interactions and offer subtle prompts if needed, but avoid over-intervening.

Finding Their Tribe

Look for opportunities where they can connect with others who share similar interests or processing styles. This could include:

1. **Special interest clubs:** As mentioned before, these can be fantastic for social connection.
2. **Therapeutic groups:** Social skills groups led by professionals can provide a safe and structured environment to practice social interactions.
3. **Inclusive sports or activities:** Look for programs that emphasize participation and fun over competition, and where coaches are understanding of different needs.

4. **Online communities:** For older children, curated and moderated online forums related to their interests can offer a sense of belonging.

The Power of Predictability and Routine: Creating a Sense of Safety for Fun

For many out-of-sync children, the world can feel chaotic and unpredictable. Establishing routines and providing clear expectations can create a sense of safety that allows them to relax and engage in fun.

Visual Schedules and Transition Aids

Visual schedules, using pictures or words, can help children understand what's coming next. This predictability reduces anxiety and makes transitions smoother.

Clear Boundaries and Expectations

Knowing what is expected of them in different situations can reduce confusion and frustration. This applies to rules during play, mealtimes, and bedtime routines.

"Safe Spaces" and Recharge Zones

Designate areas in your home where your child can go to decompress or engage in solitary, self-soothing activities. This could be their bedroom, a cozy corner, or a tent in the living room.

Embracing Imperfection: The Fun of "Good Enough"

Sometimes, the pressure to have "perfect" play or "typical" social interactions can stifle genuine joy. For out-of-sync children, it's important to embrace the "good enough" and celebrate their unique contributions.

Focus on Effort, Not Outcome

Praise their attempts, their creativity, and their perseverance, rather than solely focusing on whether they "won" or achieved a perfect result.

Redefine "Fun" on Their Terms

What looks like fun to us might not be fun for them. Be open to their definition of a good time, even if it's different from what you'd expect. Sometimes, a simple quiet activity can be deeply satisfying.

Celebrate Their Individuality

Let them know that their unique way of experiencing the world is not only okay but also wonderful. When they feel accepted and loved for who they are, their capacity for joy expands immeasurably.

Final Thoughts: The Melody of Their Own Making

Raising an out-of-sync child is a journey of discovery, adaptation, and immense love. By understanding their unique needs, celebrating their strengths, and creating an environment that supports their individuality, we can help them find their own rhythm and experience the rich tapestry of fun. Remember, the most beautiful music is often the melody played in its own unique key. Your child's laughter, their focused engagement, their moments of pure joy – these are the notes that matter most. Embrace the symphony of their being, and watch them play their heart out.

Understanding the Concept of an Out-of-Sync Child Who Has Fun

When parents encounter a child who seems “out of sync” yet still finds joy in play or activity, it often points to a deeper emotional and psychological dynamic. Rather than viewing this mismatch as a problem, exploring it as a unique expression of a child’s inner world reveals valuable insights into emotional development, social engagement, and resilience. An out-of-sync child may display behaviors that appear mismatched—perhaps ignoring social cues, moving at their own rhythm, or expressing emotions in unconventional ways—yet this divergence doesn’t diminish their capacity for fun. Instead, it reflects a distinctive way of processing experiences, one that values authenticity over conformity.

What Does It Mean to Be “Out of Sync” in Emotional and Behavioral Terms?

Being “out of sync” often describes a child whose internal rhythms differ from the expectations of their environment—whether at home, school, or in peer interactions. This can manifest in sensory sensitivities, delayed imitation, or difficulty reading social signals. However, such differences do not equate to dysfunction. For many children, this divergence creates a creative tension between their authentic self and external demands, leading to moments of unguarded joy. These fun moments—whether laughing loudly during pretend play, diving into imaginative worlds, or simply moving freely without inhibition—emerge when the child feels safe enough to be themselves. This emotional authenticity becomes a foundation for genuine enjoyment, even amid perceived discord.

Key Insights: The Hidden Benefits of Playful Disconnection

Children who seem out of sync yet engage in joyful play demonstrate remarkable strengths. Their ability to disconnect from conventional norms allows them to explore ideas, emotions, and relationships in original ways. This creative freedom fosters problem-solving skills, emotional regulation, and self-confidence. When such children laugh, invent stories, or engage in unscripted fun, they're not just entertaining themselves—they're building resilience. Their "out of sync" nature often fuels innovation, enabling them to think beyond the expected and adapt to new situations with flexibility. Recognizing these benefits shifts the focus from perceived challenges to appreciating unique strengths rooted in emotional authenticity.

Practical Applications: Supporting Fun in Everyday Life

Supporting an out-of-sync child's capacity for fun begins with creating environments that honor their rhythms. Parents and educators can foster joy by prioritizing unstructured playtime, where children lead the way without pressure to conform. Offering sensory-friendly spaces, encouraging imaginative pursuits, and validating emotional expression—even when it looks unusual—helps reinforce a child's sense of safety. Instead of correcting or redirecting constant movement or intense focus, adults can join in the activity, turning moments of disconnection into shared joy. These intentional approaches nurture confidence and deepen trust, allowing the child's natural enthusiasm to flourish without constraint.

The Broader Impact: Redefining Success and Well-Being

Viewing an out-of-sync child through the lens of fun and emotional authenticity challenges traditional metrics of development and success. Rather than measuring progress solely by social conformity or academic benchmarks, recognizing joyful engagement as a vital sign of healthy growth invites a more compassionate understanding. When children feel seen and celebrated in their uniqueness, they develop stronger self-worth and emotional intelligence. This perspective not only supports individual well-being but also enriches communities by embracing diverse ways of being. Looking ahead, integrating empathy and flexibility into educational and parenting practices will be key to nurturing resilient, creative, and joyful children.

Future Outlook: Embracing Diversity in Child Development

As awareness of neurodiversity and emotional complexity grows, the narrative around out-of-sync children is evolving. Future approaches to child development increasingly emphasize personalized support, celebrating differences as sources of strength rather than deficits. By valuing the fun that emerges from authentic expression, society moves toward inclusive environments where every child can thrive. Innovations in behavioral science and education are beginning to highlight how flexible, emotionally attuned interactions can unlock untapped potential. Ultimately, recognizing and nurturing the joy in children who feel “out of sync” paves the way for a more compassionate, dynamic, and inclusive understanding of childhood—one where fun becomes a bridge to deeper connection and lasting well-being.

When the World Spins Differently: Navigating the Joyful Journey of an 'Out of Sync' Child

The phrase "out of sync child" might conjure images of frustration, meltdowns, and parental exhaustion. However, beneath the surface of perceived discord lies a vibrant tapestry of unique personalities, boundless creativity, and an often misunderstood approach to engagement. This article delves into the world of children who don't always march to the same drummer, exploring how they experience joy, how we can support their individual rhythms, and why understanding their "out of sync" nature is key to unlocking their fullest potential.

Understanding the 'Out of Sync' Spectrum

The term "out of sync" is broad and encompasses a wide range of developmental differences. It's not a clinical diagnosis in itself, but rather a descriptive label for children whose processing, sensory sensitivities, social interactions, or emotional regulation may differ significantly from neurotypical peers. This can manifest in various ways:

1. **Sensory Processing Differences:** Some children are hypersensitive to light, sound, touch, or even certain textures, finding overwhelming stimuli jarring. Others might be hyposensitive, seeking out intense sensory input to feel regulated. This can profoundly impact their comfort and enjoyment of everyday activities.
2. **Social Communication Challenges:** Difficulty with non-verbal cues, understanding social nuances, or initiating and maintaining conversations can leave some children feeling disconnected and misunderstood, impacting their ability to engage in typical peer play.
3. **Executive Functioning Differences:** Challenges with planning, organization, impulse control, and task initiation can make structured

activities seem daunting, leading to avoidance and a feeling of being overwhelmed.

4. **Emotional Regulation Differences:** Intense emotional responses, difficulty calming down, or a different way of expressing feelings can be misinterpreted, leading to misunderstandings and impacting their ability to participate in group settings.
5. **Cognitive Differences:** Varying learning styles, processing speeds, or unique ways of thinking can mean that traditional approaches to learning and play don't always resonate.

It's crucial to remember that these are not deficits but rather differences. For parents and educators, the first step to fostering joy in an "out of sync" child is to recognize and accept their unique wiring.

The Paradox of "Out of Sync" Fun: Where Joy Blossoms

Despite the challenges, "out of sync" children possess an incredible capacity for joy. Their fun might look different, but it is no less profound. Often, their most profound moments of happiness stem from activities that cater to their specific needs and interests:

Deep Dives into Passions

Many "out of sync" children exhibit intense, focused interests. When allowed to immerse themselves in these passions – whether it's a deep dive into dinosaurs, a fascination with train schedules, or an obsession with a particular book series – they can experience unparalleled joy and flow. This isn't just a hobby; it's a pathway to feeling competent, understood, and deeply engaged. Supporting these interests, even if they seem niche, is paramount to fostering their happiness. Look for **childhood interests** that can become avenues for learning and connection.

Sensory Havens and Thrills

For children with sensory processing differences, fun often lies in creating environments that are either calming or stimulating in a controlled way. This might mean a quiet corner with soft blankets and weighted toys for a child seeking regulation, or a trampoline and sensory bins filled with a variety of textures for a child seeking input. The key is to observe what makes them feel good and safe. This is where **sensory play** becomes a powerful tool for joy and self-discovery.

Creative Expression Unleashed

Many "out of sync" children express themselves through art, music, movement, or imaginative play. Their unique perspectives can lead to astonishingly original creations. When allowed the freedom to experiment without judgment, their inherent creativity can blossom, leading to immense satisfaction and a sense of accomplishment. Encourage their **creative outlets** and celebrate their individuality.

Meaningful Connections, On Their Terms

While social interactions can be challenging, "out of sync" children are capable of forming deep and meaningful connections. Their friendships may be fewer in number but often characterized by loyalty and understanding. Fun can be found in one-on-one interactions, shared interests, or with peers who accept them for who they are. Focus on fostering **positive social interactions** and understanding their communication styles.

Mastering Skills and Achieving Goals

When tasks are broken down into manageable steps and presented in a way that aligns with their learning style, "out of sync" children can experience immense pride and joy in mastering new skills. This could be learning to read, mastering a particular video game, or successfully completing a chore. The sense of accomplishment is a powerful motivator and a source of genuine

happiness. Celebrating **child development milestones** in their unique journey is crucial.

Strategies for Fostering Joy and Supporting the 'Out of Sync' Child

As parents, caregivers, and educators, our role is to be guides, creating pathways for these children to experience the world in a way that brings them joy and fosters their growth. This requires a shift in perspective and a commitment to individualized support.

Embrace Individuality and Practice Acceptance

The foundation of fostering joy is acceptance. Understand that their "out of sync" nature is not a flaw but a difference. Celebrate their unique strengths and perspectives. This acceptance allows them to feel seen, valued, and safe to be themselves, which is the bedrock of happiness. Remember, **neurodiversity** celebrates these differences.

Create a Sensory-Friendly Environment

Pay attention to their sensory needs. Minimize overwhelming stimuli in their environment. This might involve dimmer lighting, reducing background noise, or providing designated quiet spaces. Conversely, offer opportunities for appropriate sensory input, such as fidget toys, weighted blankets, or sensory bins. This proactive approach can prevent distress and open the door to enjoyable experiences. Consider **sensory regulation techniques** that work for them.

Structure with Flexibility

While routines can be beneficial, rigidity can be detrimental. Offer predictable structures but be prepared to adapt when needed. Break down tasks into smaller, more manageable steps. Use visual aids, clear instructions, and plenty

of positive reinforcement. The goal is to build confidence, not overwhelm. This supports **child learning styles** and reduces anxiety.

Prioritize Interests and Passions

Allow them ample time and space to explore their intense interests. Provide resources, books, and opportunities to delve deep into their passions. When children are deeply engaged in something they love, they are often at their happiest and most regulated. This is a powerful form of **child engagement**.

Facilitate Meaningful Social Connections

Don't force them into situations that cause anxiety. Instead, focus on quality over quantity. Help them identify peers who are understanding and accepting. Practice social skills in a safe and low-pressure environment. Role-playing, social stories, and explicit teaching of social cues can be incredibly beneficial. Look for **inclusive play opportunities**.

Celebrate Small Victories and Progress

Acknowledge and celebrate every step of progress, no matter how small. This builds their self-esteem and encourages continued effort. Focus on effort and perseverance rather than just the outcome. Their **childhood development** is a journey, and every milestone, no matter how unconventional, deserves recognition.

Collaborate with Professionals

If you're struggling to understand or support your child's unique needs, don't hesitate to seek professional guidance. Therapists, educators, and developmental specialists can offer invaluable insights, strategies, and support. They can help identify specific challenges and provide tailored interventions. Professional guidance is key to unlocking their potential and fostering well-being. This can include seeking support for **child behavioral development**.

By understanding their unique rhythms, embracing their individuality, and providing tailored support, we can unlock a world of joy, creativity, and fulfilling experiences for them. Their "out of sync" nature is not a barrier to happiness but an invitation to explore a richer, more nuanced way of being in the world. Questions & Answers About out of sync child has fun

----	----------	--------

1	My child with sensory processing issues struggles with social play. How can we help them have fun without feeling overwhelmed?	Focus on structured, one-on-one or small-group activities tailored to their sensory needs. Offer quiet spaces, sensory-friendly toys, and clear social cues. Gradual exposure to new social situations with a trusted adult is key. Prioritize activities where they can lead and have predictable outcomes.
2	My 'out of sync' child has a short attention span. What are some fun activities that can keep them engaged?	Break down activities into smaller, manageable steps. Use timers to signal transitions and offer choices to give them a sense of control. Engaging their interests with hands-on, multi-sensory experiences like building, art, or simple science experiments can be very effective. Positive reinforcement for engagement, not just completion, helps.
3	How can I foster imagination and creative play in a child who struggles with abstract concepts or following complex instructions?	Start with open-ended toys like blocks, playdough, or simple dress-up items. Provide a few props and let their imagination guide the play. Narrate their actions and ask simple, open-ended questions to encourage elaboration. Focus on the process and enjoyment, not a specific end product.
4	My child has difficulty with transitions, which often derails fun activities. What are some strategies to make transitions smoother and more enjoyable?	Use visual schedules or countdowns to prepare them for upcoming changes. Offer a 'transition object' they can hold. Make transitions part of the fun with music, a quick game, or a special song. Most importantly, be patient and acknowledge their feelings during transitions.
5	What are some outdoor activities that are both fun and beneficial for a child who may be 'out of sync' with typical play?	Nature offers fantastic sensory experiences! Consider sensory gardens, digging in sand or dirt, water play (with supervision), obstacle courses using natural elements, or simply exploring textures and sounds outdoors. Emphasize gross motor skills like running, jumping, and climbing in a less structured, more forgiving environment.
